## NVR Pre-Installation

The DS-9600/8600/7700/7600NI-ST and DS-7700/7600NI-SP series NVR are highly advanced surveillance equipment that should be installed with care. Please take into consideration the following precautionary steps before installation of the NVR.

1. Keep all liquids away from the NVR.
2. Install the NVR in a well-ventilated and dust-free area.
3. Ensure environmental conditions meet factory specifications.
4. Install a manufacturer recommended HDD.

## NVR Installation

During the installation of the NVR:

1. Use brackets for rack mounting.
2. Ensure there is ample room for audio and video cables.
3. When installing cables, ensure that the bend radius of the cables are no less than five times than its diameter.
4. Connect both the alarm and RS-485 cable.
5. Allow at least 2cm (~0.75-inch) of space between racks mounted devices.
6. Ensure the NVR is grounded.
7. Environmental temperature should be within the range of -10 °C ~ 55 °C, 14 °F ~ 131 °F.
8. Environmental humidity should be within the range of 10% ~ 90%.

## Hard Disk Installation

### *Before you start:*

Before installing a hard disk drive (HDD), please make sure the power is disconnected from the NVR. A factory recommended HDD should be used for this installation.

Up to 8 SATA hard disks can be installed on your NVR.

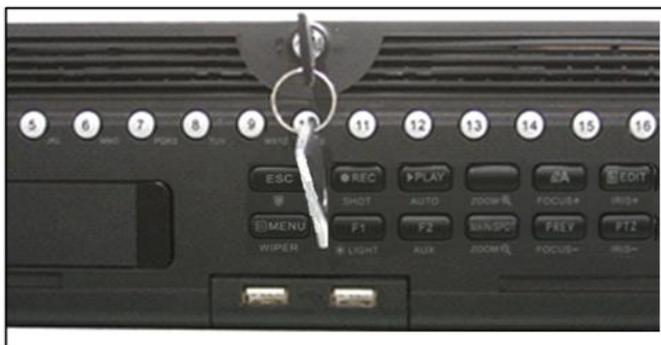

**Tools Required:** Screwdriver.

### *Steps (for DS-9600NI-ST):*

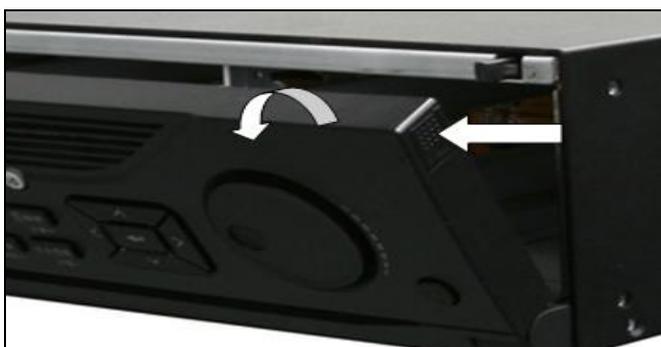

1. Fasten the hard disk mounting handle to the hard disk with screws.

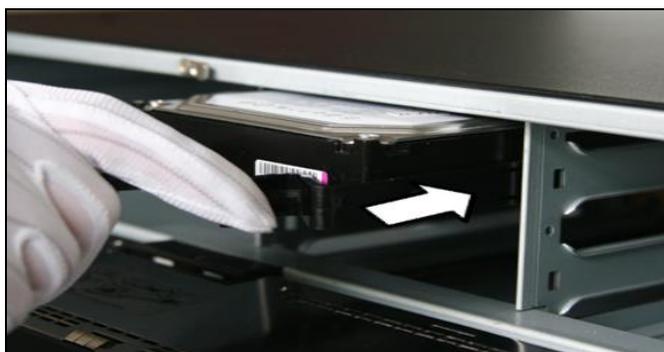

2. Insert the key and turn in clockwise direction to open the panel lock.

3. Press the buttons on the panel of two sides and open the front panel.

4. Insert the hard disk along the slot until it is placed into position.

5. Repeat the above steps to install other hard disks onto the NVR. After having finished the installation of all hard disks, replace the front panel and lock it with the key again.

**Steps (for DS-8600NI-ST):**

## Peripheral Connections

### Connecting to Alarm Input / Output Device

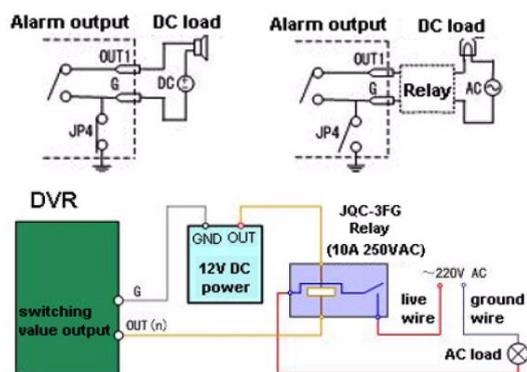

The alarm input/output interface of the NVR is shown as below:

The alarm input is an open/closed relay. If the input is not an open/closed relay, follow the connection diagram below:

To connect to an AC/DC load, use the following diagram:

For DC load, JP4 can be used within the limit of 12V/1A safely. If the interface is connected to an AC load, JP4 should be left open. Use an external relay for safety (as shown in the figure above).

There are 4 jumpers (JP4, JP5, JP6, and JP7) on the motherboard, each corresponding with one alarm output. By default, jumpers are connected. To connect an AC load, jumpers should be removed.

**Note:** An external relay is needed to prevent electric shock when connecting to an AC load.

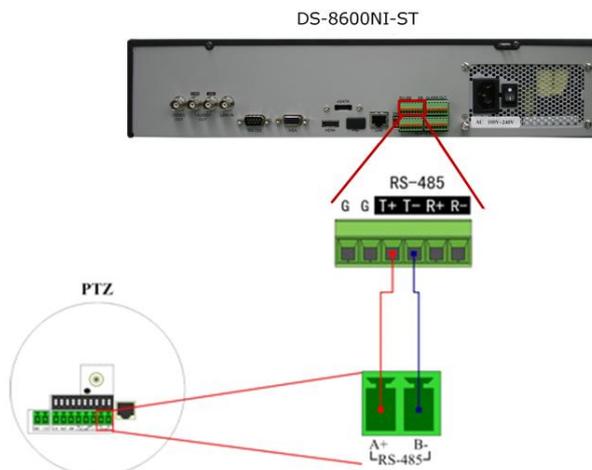

## Alarm Connection

To connect alarm devices to the NVR:

1. Disconnect *pluggable block* from the ALARM IN /ALARM OUT terminal block.
2. Unfasten stop screws from the *pluggable block*, insert signal cables into slots and fasten stop screws. Ensure signal cables are in tight.
3. Connect *pluggable block* back into terminal block.

## RS-485 Connection

In this manual we take the RS-485 connection of the DS-8600NI-ST as an example.

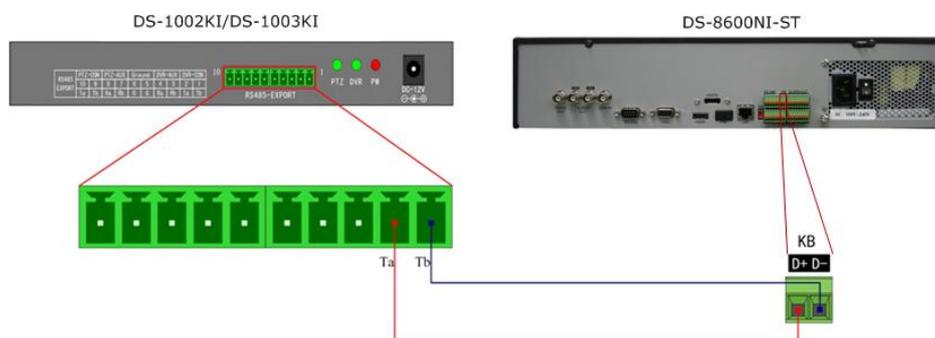

To connect RS-485 devices to the NVR:

1. Disconnect pluggable block from the RS-485 terminal block.
2. Unfasten stop screws from the *pluggable block*, insert signal cables into slots and fasten stop screws. Ensure signal cables are in tight.
3. Connect *pluggable block* back into terminal block.

**Note:** Make sure the pan/tilt receiver unit is connected to the T+ and T- of the NVR.

## Controller Connection

To connect a controller to the NVR:

1. Disconnect pluggable block from the KB terminal block.
2. Unfasten stop screws from the KB D+, D- *pluggable block*, insert signal cables into slots and fasten stop screws. Ensure signal cables are in tight.
3. Connect Ta on controller to D+ on terminal block and Tb on controller to D- on terminal block. Fasten stop screws.
4. Connect *pluggable block* back into terminal block.

**Note:** Make sure both the controller and NVR are grounded.
